Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 37-49 are pending and being acted upon.
2. The disclosure is objected to because of the following informalities:

The repeated use of the trademarks "MICROTITER", "IMMUNOPURE", "SEPHAROSE", "PBLUESCRIPT", "QIAEX", "READY-TO-GO", "PROBLOTT", "OPTI-MEM", and "ZAP EXPRESS" has been noted in this application. They should be capitalized and accompanied by the TM or ® symbol wherever it appears and be accompanied by the generic terminology. Although the use of trademarks is permissible in patent applications, the proprietary nature of the trademarks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Appropriate correction is required. Applicant is further notified that should a significant number of substitute amended paragraphs be submitted, said substituted amended paragraphs will not be entered into the specification and another substitute specification will be required.

Applicant has indicated that a substitute specification will be provided upon the identification of allowable subject matter.

3. In view of Applicant's amendment and response, filed 1/08/02, only the following rejection remains.
4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
5. Claims 37-49 stand rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant's Deposit Declaration, filed 1/08/02, indicates that the hybridomas designated FERM BP-7441, FERM BP-7442, and FERM BP-7443 have been deposited under the provisions of the Budapest Treaty and that all restrictions on public availability

will be irrevocably removed upon the granting of a patent based on the instant application. However, Applicant must further declare that said hybridoma will be maintained in a public depository for 30 years after the date of deposit, or 5 years after the last request for a sample, or for the enforceable life of the patent, whichever is longer. See MPEP 2408.

6. The following are New Grounds of Rejection necessitated by Applicant's amendment, filed 1/08/02.

7. Claim 49 is rejected under 35 U.S.C. § 112, first paragraph, as the specification does not contain a written description of the claimed invention, in that the disclosure does not reasonably convey to one skilled in the relevant art that the inventor(s) had possession of the claimed invention at the time the application was filed. This is a new matter rejection.

The specification and the claims as originally filed do not provide support for the invention as now claimed, specifically, a hybridoma "A1G5". Applicant presumably means a hybridoma "A1G5." Amending the claim accordingly would obviate the rejection.

8. No claim is allowed.

9. Hybridomas A1G5 having accession No. FERM BP-7441, D2F4 having accession No. FERM BP-7442, E3H8 having accession No. FERM BP-7443 appear to be free of the prior art.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
